

MUKUND V

B.E. CSE Cyber Security Student | Frontend & Full-Stack Developer

📞 8431041791 ✉ eng22mukund@gmail.com [in LinkedIn](#) [GitHub](#) [Portfolio](#)

Education

RNS Institute of Technology

B.E. Computer Science and Engineering – Cyber Security

2023 – 2027

CGPA: 8.8/10

Experience

Nokia University Day Project

2025

Student Developer – Product Security using Generative AI

Bengaluru, India

- Built an AI-assisted product security workflow for Docker and Kubernetes workloads with a 4-member student team and Nokia mentors.
- Integrated Trivy, Kubescape and kube-score outputs with an LLM-based remediation layer to suggest secure Dockerfile and Kubernetes YAML fixes.
- Developed CLI and Flask-based interfaces for vulnerability scanning, remediation reports and a RAG-style security chatbot.
- Won **Best Implemented Industry Project** at Nokia University Day 2025.

Projects

Self-Care MERN App | React, Node.js, Express, MongoDB, Vercel, Render | [GitHub](#)

2026

- Built and deployed a full-stack self-care platform with authentication, goal tracking, daily routines, check-ins and task completion flows.
- Implemented a points system with user point profiles, transaction history and summary APIs to improve engagement and progress visibility.
- Debugged production issues across Vercel, Render and MongoDB Atlas, including CORS, environment variables, stale cache and data consistency bugs.

RepoScope – Developer Analytics Dashboard | React, GitHub API, REST APIs, Vercel | [GitHub](#)

2026

- Created a GitHub analytics dashboard that turns repository and profile data into clean developer insights for project evaluation.
- Designed responsive dashboard views for repositories, profile metrics and README-heavy project pages using reusable React components.
- Added centralized error handling for not-found, rate-limit, network and server failures to make API behavior more reliable.

CyberDeck Resume OS | React, Vite, Tailwind CSS, Framer Motion | [GitHub](#)

2026

- Built a cyberpunk portfolio website to present projects, skills, resume highlights and contact information through a polished product-style interface.
- Implemented responsive layouts, animated navigation, theme switching, modal project case studies and mobile-first interface refinements.
- Improved UX across desktop and mobile by resolving routing, overflow, navigation and layout issues during iterative releases.

Enhancing Product Security using Gen AI | Python, Docker, Kubernetes, Gen AI, DevSecOps

2025

- Automated vulnerability assessment for containerized applications by combining security scanners, SBOM data and AI-generated remediation guidance.
- Generated developer-friendly reports and suggested secure configuration changes for Docker images and Kubernetes manifests.

DishaRakshak – GPS-less Indoor Navigation System | ESP32, IMU, Python, OSM, Embedded Systems

2026

- Developed an academic prototype for GPS-less navigation using foot-mounted IMU units, an ESP32 belt hub and dead-reckoning based movement tracking.
- Built simulation and visualization modules for campus route mapping using Python, OpenStreetMap data and graph-based path planning.

Technical Skills

Frontend: React.js, JavaScript, HTML, CSS, Tailwind CSS, Framer Motion, Responsive UI

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, Authentication, API Integration

Programming: Java, Python, C, C++, Bash

Tools & Platforms: Git, GitHub, Vercel, Render, MongoDB Atlas, Docker, Kubernetes, Linux basics

Achievements & Leadership

- Won **Best Implemented Industry Project** at Nokia University Day 2025 for a Gen AI-based product security solution.
- Treasurer, IEEE Computer Society, RNS Institute of Technology.
- Class Representative, Department of CSE – Cyber Security.
